EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below.

Claims 52-95 have been canceled.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Aileen Law on August 10, 2004.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-51, drawn to a method for regenerating a deactivated Fischer-Tropsch catalyst, classified in class 518, subclass 709.
- II. Claims 52-95, drawn to an apparatus for regenerating a deactivated Fischer-Tropsch catalyst, classified in class 422, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced with an apparatus disclosed in US patent 2,670,364.

Art Unit: 1621

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Ms. Aileen Law on August 10, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-51. Affirmation of this election must be made by applicant in replying to this Office action. Claims 52-95 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Reason for allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record such as, US patent 2,670,364 teaches a process for regenerating deactivated iron based Fischer-Tropsch catalyst. However, the prior art of record neither teaches nor suggests degassing the Fischer-Tropsch catalyst and using solvent extraction to remove wax and contaminants from an iron-based catalyst in a natural circulation and then wax-free catalyst is subjected to oxidation to convert the iron to initial oxidized state using alkali promoter and treating the catalyst precursor with a synthesis gas to form an active catalyst.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
